

### The impact

Through a partnership between TELUS and Computers for Schools, 2,724 computers, 3,428 laptops, and 163 printers were donated to schools across the country in 2007.

## Implementation

### Promote your program

- Send email notifications to explain any new program
- Create an electronic newsletter to educate employees on sustainable practices
- Make announcements at staff meetings
- Create signage so recycling bins are noticeable and there is no confusion

### Monitor your progress

- Check that the recycling collection is not contaminated with garbage, or that there is no recycling ending up in the garbage. If there is you may need more employee education or better signage
- Make sure your garbage and recycling bins are full when they are picked up. A half-full dumpster will cost you the same per pickup as a completely full dumpster. You can always have it picked up less often or switch to a smaller container
