

The impact

Metrotower Office Complex diverts an estimated 1.5 tonnes of mixed paper and cardboard each month through their successful recycling program

Engage your staff

- Ask your employees for suggestions on how to improve efficiency and reduce waste.
- Raise awareness through training and education.
- Recognize and honour employees for advancing valuable ideas and setting good examples.
- Nominate a champion to promote your program from development to implementation.
- Discuss the project with management—make sure they are on board with changes.
- Involve janitorial staff—they deal with waste on a regular basis and can provide insight into planning and implementation.

Form a Green Team

Find people throughout your organization who are passionate about reducing waste. Set specific goals, such as zero recyclable paper in the garbage, and all reports double-sided.
